

Installation Information

Learn2Book is a series of linked Adobe (Macromedia) Director movies. These movies come with a number of internal components such as embedded Flash Movies, Macromedia XTRAS, fonts and other elements.

The “projector” in which these movies come is entirely self-contained and has included, all of the elements required to run the software. It is supplied as an executable file on a CD-ROM or via a download and it is simply a matter of either copying this file onto the desired computers or onto your server for networked distribution.

Learn2Book does not need to write info to a database or local directory/file.

System requirements are

Intel Pentium processor

Either Windows 95, Windows 98, Windows NT4 or later, Windows 2000, Windows 2000ME, Windows XP, Windows Vista

12MB of available RAM

CD-ROM Drive

Printer

Learn2Book is a simulation and does not require any Internet or telephone connection. Neither do you need an Istel, Prestel or Fastrack connection. The programme simply runs from the desktop.

In addition support materials are supplied on the CD-ROM or download as PDF files. These required to be printed.
